

## Country overview

### Malnutrition burden

**South Africa is on course to meet the global targets for under-five overweight and under-five wasting, but is off course to meet the targets for all other indicators analysed with adequate data. There is insufficient target data to assess South Africa’s progress for infant exclusive breastfeeding.**

South Africa experiences a malnutrition burden among its under-five population. As of 2016, the national prevalence of under-five overweight is 13.3%, which has decreased from 17.2% in 2012. The national prevalence of under-five stunting is 27.4%, which is greater than the developing country average of 25%. Conversely, South Africa’s under-five wasting prevalence of 2.5% is less than the developing country average of 8.9%.

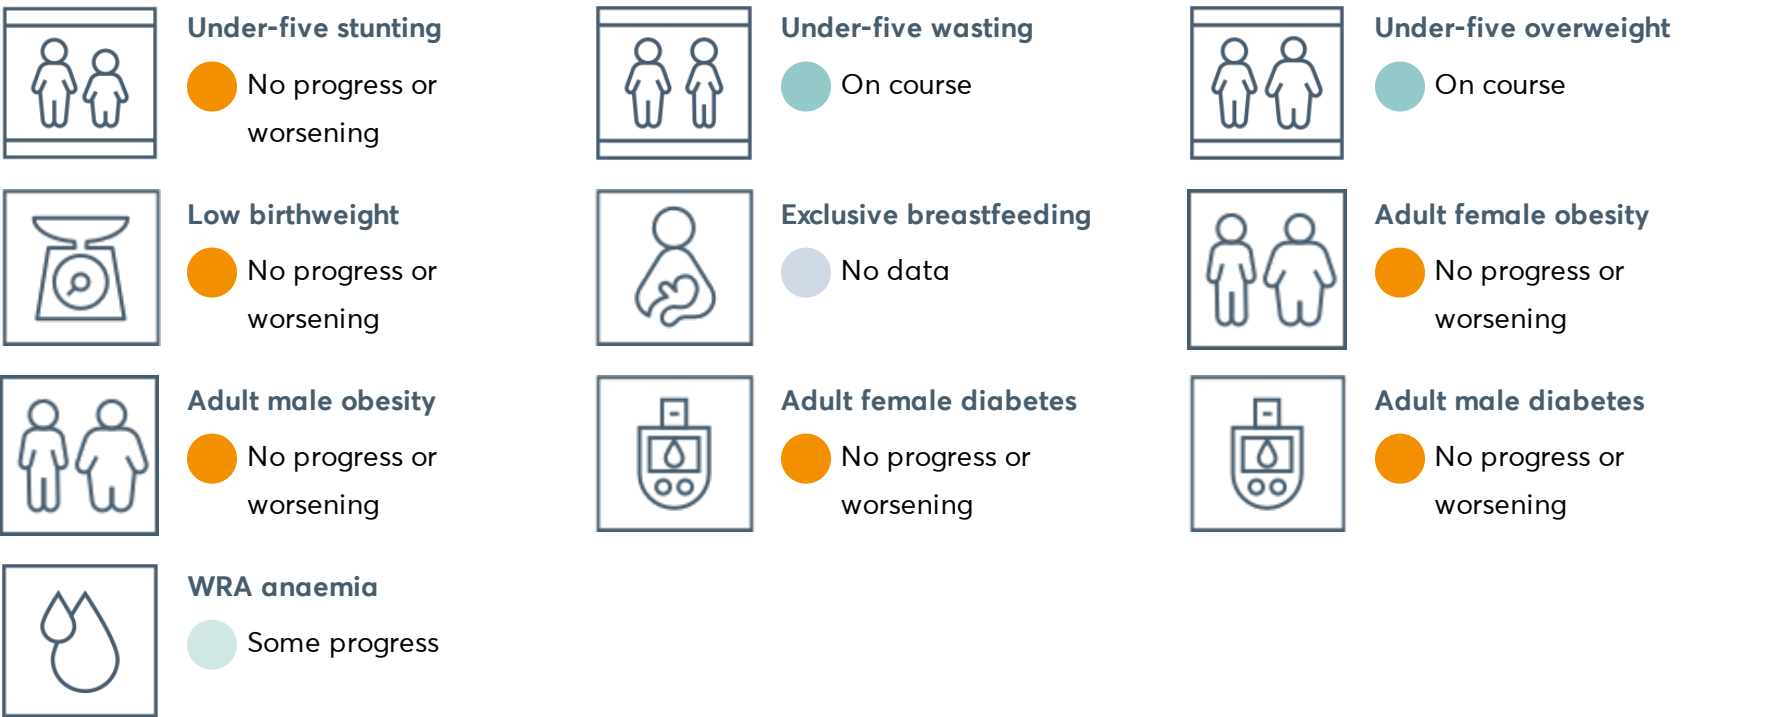

In South Africa, 31.6% of infants under 6 months are exclusively breastfed. South Africa’s 2015 low birth weight prevalence of 14.2% has decreased slightly from 15% in 2000.

South Africa’s adult population also face a malnutrition burden. 25.8% of women of reproductive age have anaemia, and 12.6% of adult women have diabetes, compared to 9.7% of men. Meanwhile, 39.6% of women and 15.4% of men have obesity.

# Resources, policies and targets

## Development assistance

Sources: Development Initiatives based on OECD Development Assistance Committee (DAC) Creditor Reporting System (CRS).

Notes: ODA = official development assistance. Amounts based on gross ODA disbursements, constant 2017 prices. Figure includes ODA grants and loans, but excludes other official flows and private grants.

# National policies

Mandatory legislation for salt iodisation	Yes
Sugar-sweetened beverage tax	Yes
Food-based dietary guidelines	Yes
Policy to reduce salt consumption	Yes
Operational policy, strategy or action plan to reduce unhealthy diet related to NCDs	Yes
Operational, multisectoral national NCD policy, strategy or action plan	No
Operational policy, strategy or action plan for diabetes	Yes
Policy to reduce the impact on children of marketing of foods and beverages high in saturated fats, trans-fatty acids, free sugars or salt	Yes
Policy to limit saturated fatty acids and virtually eliminate industrially produced trans-fats	Yes

Sources: [Global Fortification Data Exchange 2018](#); Sugar-sweetened data prepared using data from the [NOURISHING database](#), academic references and market reports; [FAO 2018](#); [WHO Global database on the Implementation of Nutrition Action \(GINA\)](#), [2nd Global Nutrition Policy Review](#), [WHO Global Health Observatory](#).

Notes: NA = not applicable; NCD = non-communicable disease.

Targets included in national (nutrition or other) plan

Stunting	Anaemia
Yes	Yes
Low birth weight	Child overweight
Yes	Yes
Exclusive breastfeeding	Wasting
Yes	Yes
Salt intake	Overweight adults and adolescents
No	Yes
Multisectoral comprehensive nutrition plan	
Yes
