

Overview

Malnutrition status

Grenada is off course to meet the global targets for anaemia in women of reproductive age, male diabetes, female diabetes, male obesity, and female obesity. There is insufficient target data to assess Grenada's progress for under-five overweight, under-five stunting, under-five wasting, infant exclusive breastfeeding, and low birth weight.

Grenada has no prevalence data available for under-five overweight, stunting, or wasting.

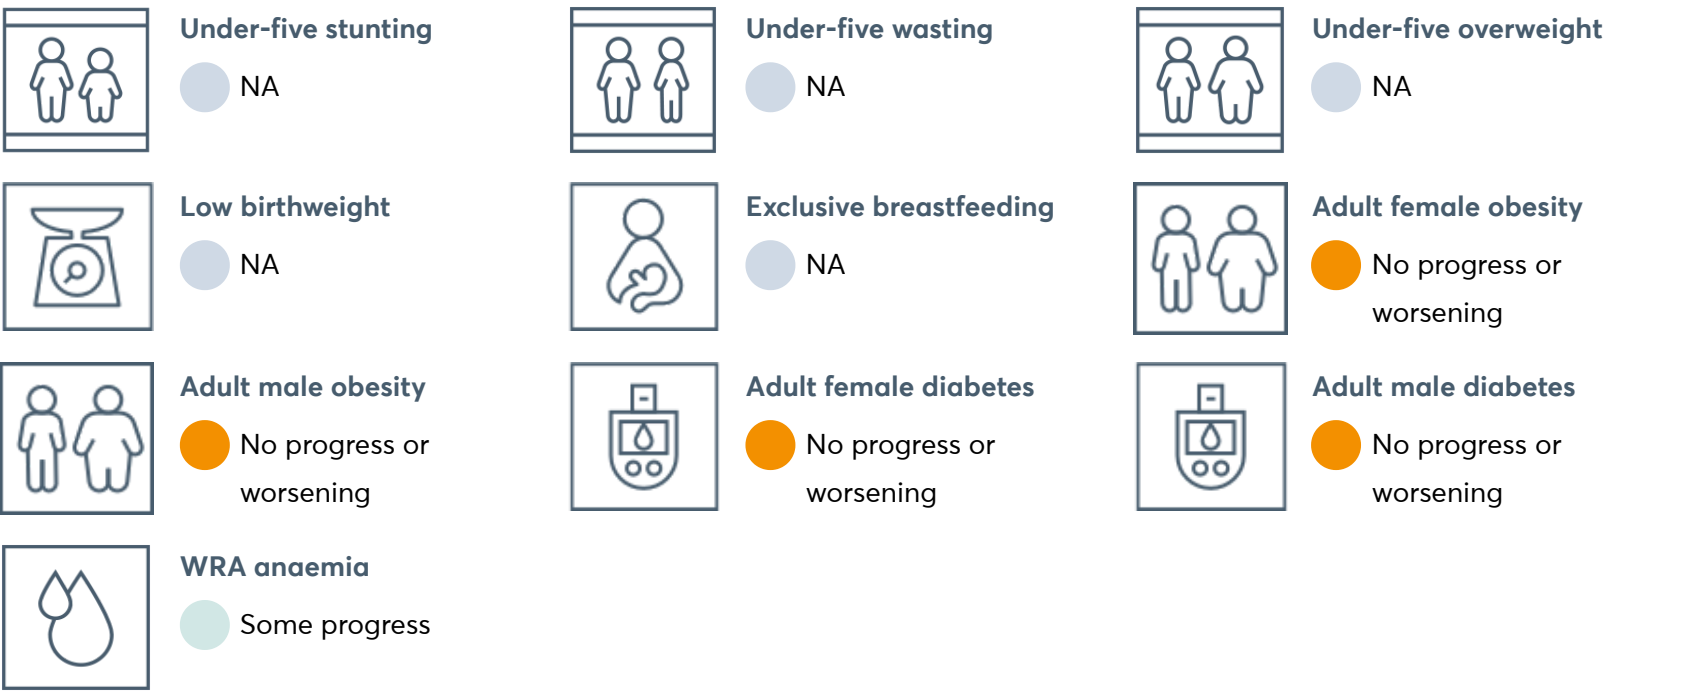

There is also insufficient data on exclusive breastfeeding among infants, and on low birth weight.

Grenada's adult population face a malnutrition burden. While there is no prevalence data available for anaemia among women of reproductive age, 13.3% of adult women suffer from diabetes, compared to 8.8% of men. Meanwhile, 29% of women and 13.3% of men suffer from obesity.

Resources, policies and targets

Development assistance

Sources: Development Initiatives based on OECD Development Assistance Committee (DAC) Creditor Reporting System (CRS).

Notes: ODA = official development assistance. Amounts based on gross ODA disbursements, constant 2017 prices. Figure includes ODA grants and loans, but excludes other official flows and private grants.

National policies

| | |
|--|-----|
| Mandatory legislation for salt iodisation | No |
| Sugar-sweetened beverage tax | No |
| Food-based dietary guidelines | Yes |
| Policy to reduce salt consumption | No |
| Operational policy, strategy or action plan to reduce unhealthy diet related to NCDs | Yes |
| Operational, multisectoral national NCD policy, strategy or action plan | Yes |
| Operational policy, strategy or action plan for diabetes | Yes |
| Policy to reduce the impact on children of marketing of foods and beverages high in saturated fats, trans-fatty acids, free sugars or salt | No |
| Policy to limit saturated fatty acids and virtually eliminate industrially produced trans-fats | No |

Sources: Global Fortification Data Exchange 2018; Sugar-sweetened data prepared using data from the NOURISHING database, academic references and market reports; FAO 2018; WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review, WHO Global Health Observatory.

Notes: Add note: NA = not applicable; NCD = non-communicable disease.

Targets included in national (nutrition or other) plan

| | |
|--|-----------------------------------|
| Stunting | Anaemia |
| Yes | Yes |
| Low birth weight | Child overweight |
| Yes | Yes |
| Exclusive breastfeeding | Wasting |
| Yes | Yes |
| Salt intake | Overweight adults and adolescents |
| Yes | Yes |
| Multisectoral comprehensive nutrition plan | |
| Yes | |
