

# Latin America and the Caribbean

## Regional overview

### Malnutrition burden

In the Latin America and Caribbean region, there has been some progress towards achieving global nutrition targets. The global target for under-five wasting has 12 countries on course to meet it, under-five stunting has eight countries on course, under-five overweight has seven countries on course, while infant exclusive breastfeeding has three countries on course. However, not a single country in the region is on course to meet the targets for anaemia in women of reproductive age, low birth weight, male diabetes, female diabetes, male obesity, and female obesity. 25 countries in the region have insufficient data to comprehensively assess their progress towards these global targets.

Although it performs relatively well against other regions, Latin America and the Caribbean still experiences a malnutrition burden among its under-five population. The average prevalence of overweight in under-fives is 7.5%, this is greater than the global average of 5.9%. The prevalence of stunting in under-fives is 9%, this is significantly less than the global average of 21.9%. The Latin America and Caribbean region's prevalence of wasting in under-fives of 1.3% is also less than the global average of 7.3%.

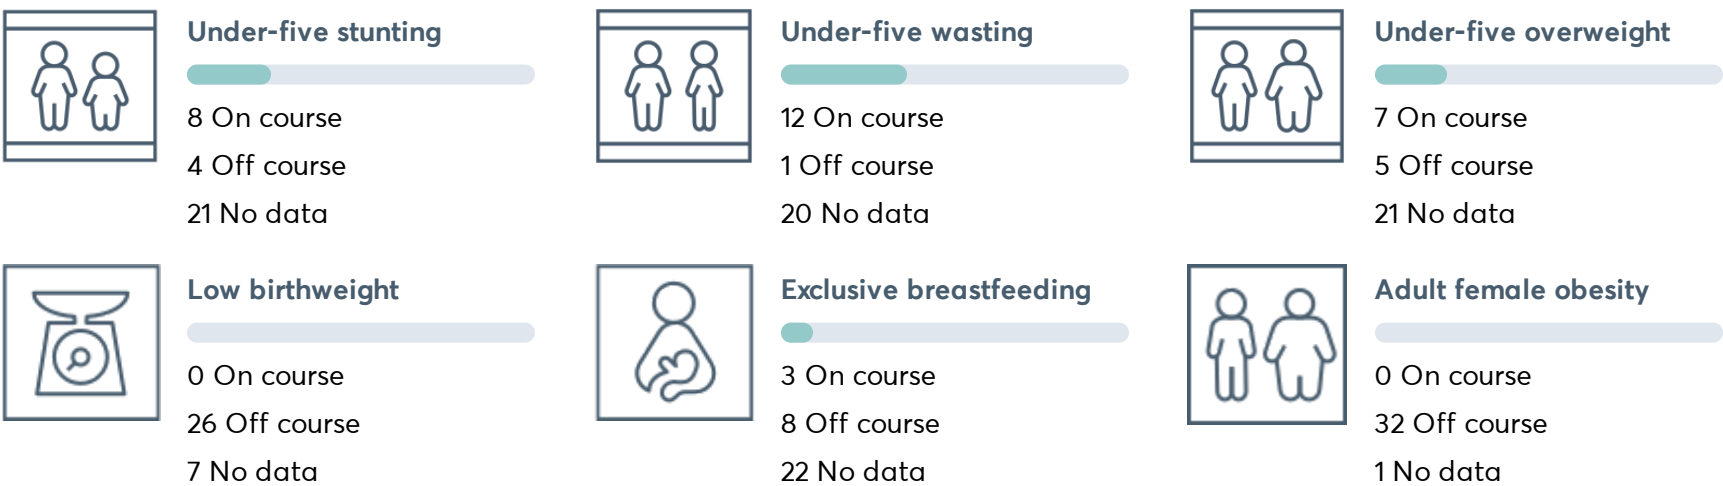

Some 46.4% of infants under 23 months in the Latin America and Caribbean region are exclusively breastfed, while the region's average low birth weight prevalence of 8.7% is less than the global average of 14.6%.

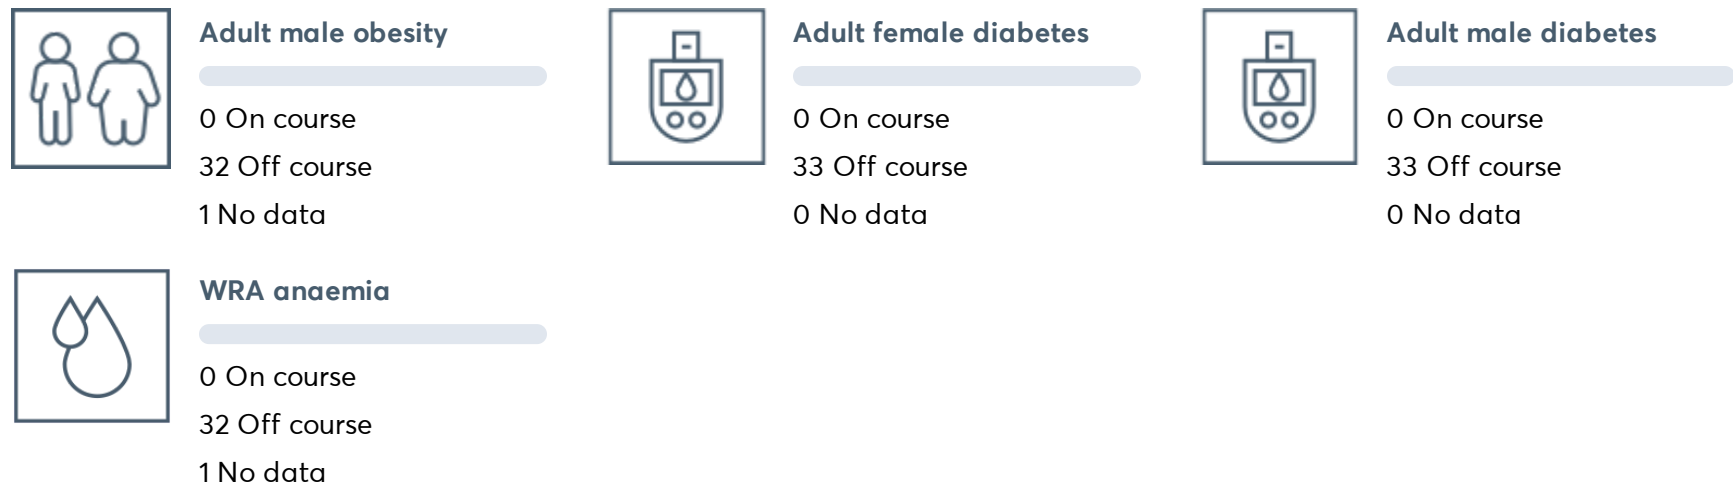

The Latin America and Caribbean region's adult population also face a malnutrition burden. An average of 22% of women of reproductive age have anaemia, and 9.6% of adult women have diabetes, compared to 8.8% of men. Meanwhile, 28% of women and 20.1% of men have obesity.

# Resources, policies and targets

## Development assistance

Sources: Development Initiatives based on OECD Development Assistance Committee (DAC) Creditor Reporting System (CRS).

Notes: ODA = official development assistance. Amounts based on gross ODA disbursements, constant 2017 prices. Figure includes ODA grants and loans, but excludes other official flows and private grants.

# National policies

Mandatory legislation for salt iodisation	19/33
Sugar-sweetened beverage tax	6/33
Food-based dietary guidelines	28/33
Policy to reduce salt consumption	12/33
Operational policy, strategy or action plan to reduce unhealthy diet related to NCDs	24/33
Operational, multisectoral national NCD policy, strategy or action plan	18/33
Operational policy, strategy or action plan for diabetes	25/33
Policy to reduce the impact on children of marketing of foods and beverages high in saturated fats, trans-fatty acids, free sugars or salt	7/33
Policy to limit saturated fatty acids and virtually eliminate industrially produced trans-fats	7/33

Sources: Global Fortification Data Exchange 2018; Sugar-sweetened data prepared using data from the NOURISHING database, academic references and market reports; FAO 2018; WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review, WHO Global Health Observatory.

Notes: Value refers to the number of countries with policy. NA = not applicable; NCD = non-communicable disease.

Targets included in national (nutrition or other) plan

Stunting	Anaemia
24/33	14/33
Low birth weight	Child overweight
21/33	26/33
Exclusive breastfeeding	Wasting
25/33	20/33
Salt intake	Overweight adults and adolescents
22/33	26/33
Multisectoral comprehensive nutrition plan	
20/33	

Sources: WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review.

Notes: Value refers to the number of countries with target.

# Economics and demography

## Poverty rates (%) and GDP (PPP\$)

Sources: World Bank 2019, IMF World Economic Outlook Database 2019.

Notes: PPP = purchasing power parity. Based on population weighted means of between 23 and 32 countries.

## Income inequality
