

# Australia and New Zealand

## Subregional overview

### Malnutrition burden

In the Australia and New Zealand subregion, there has been some progress towards achieving global nutrition targets. The global targets for male diabetes and female diabetes each have one country on course to meet them. However, not a single country in the subregion is on course to meet the targets for under-five overweight, under-five stunting, under-five wasting, infant exclusive breastfeeding, anaemia in women of reproductive age, low birth weight, male obesity, and female obesity. Two countries in the subregion have insufficient data to comprehensively assess their progress towards these global targets.

The Australia and New Zealand subregion has no prevalence data available for under-five overweight, stunting, or wasting.

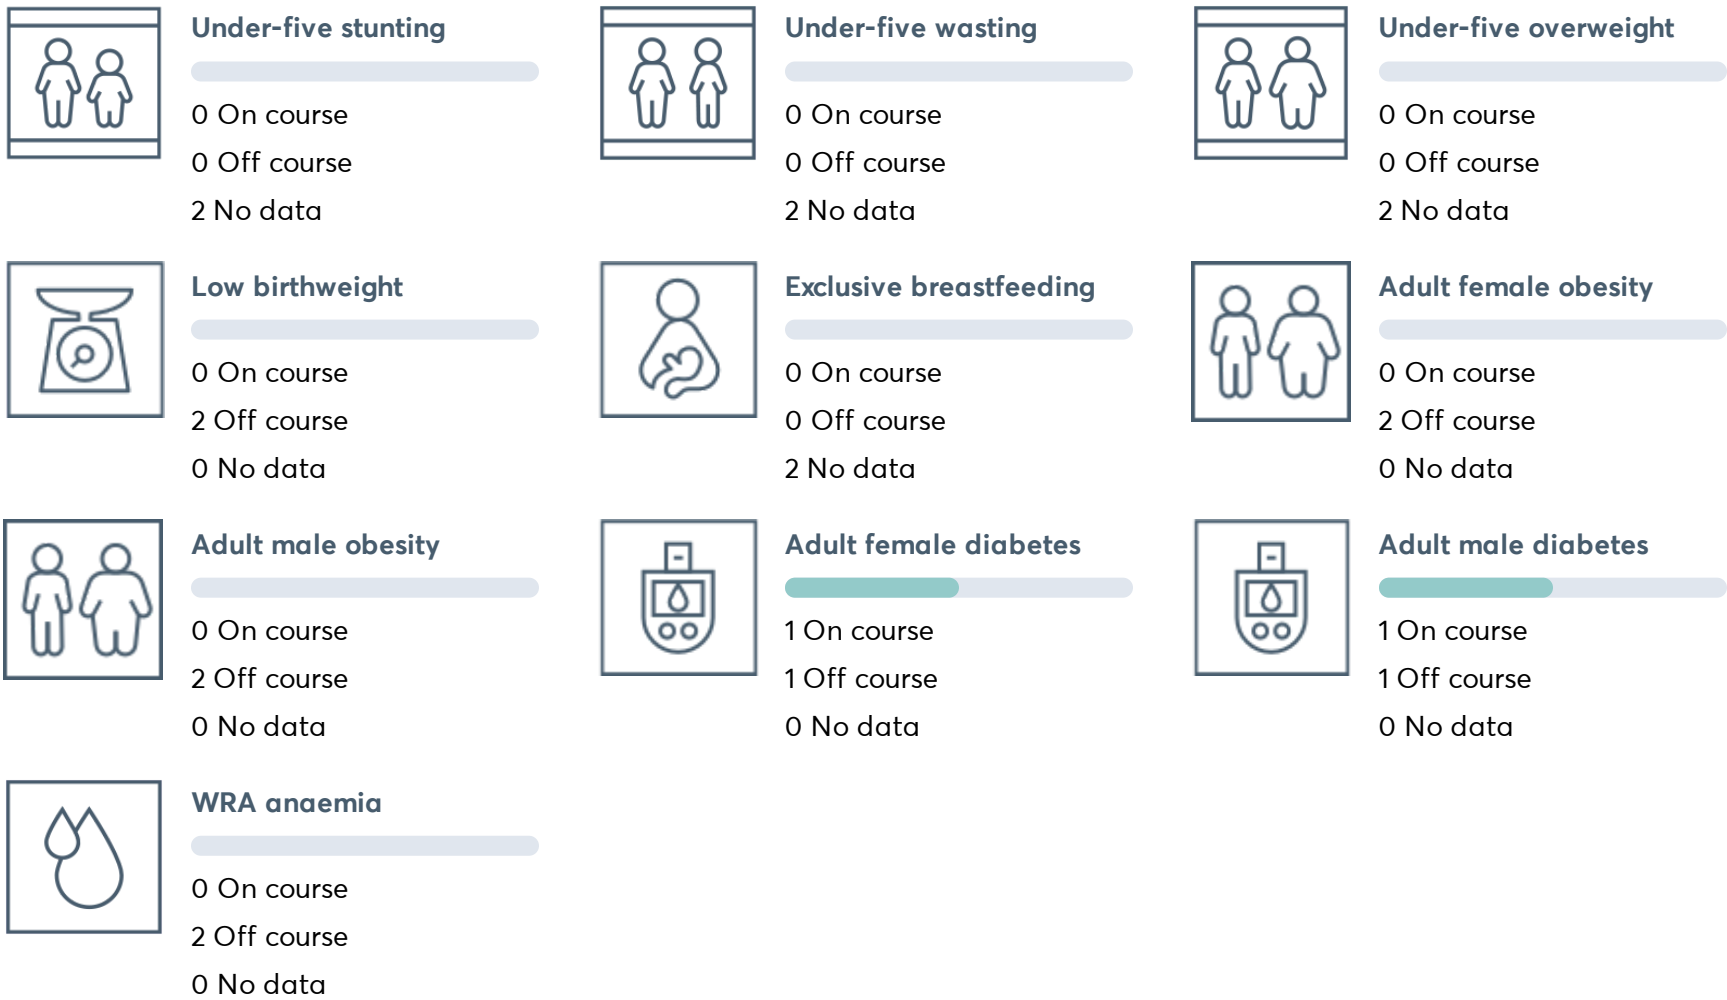

There is also insufficient data on exclusive breastfeeding among infants, while the subregion's average low birth weight prevalence of 6.4% is less than the global average of 14.6%.

The Australia and New Zealand subregion's adult population face a malnutrition burden. An average of 9.5% of women of reproductive age have anaemia, and 7% of adult men have diabetes, compared to 5.2% of women. Meanwhile, 29.6% of men and 28.9% of women have obesity.

# Resources, policies and targets

## Development assistance

Sources: Development Initiatives based on OECD Development Assistance Committee (DAC) Creditor Reporting System (CRS).

Notes: ODA = official development assistance. Amounts based on gross ODA disbursements, constant 2017 prices. Figure includes ODA grants and loans, but excludes other official flows and private grants.

# National policies

Mandatory legislation for salt iodisation	2/2
Sugar-sweetened beverage tax	0/2
Food-based dietary guidelines	2/2
Policy to reduce salt consumption	2/2
Operational policy, strategy or action plan to reduce unhealthy diet related to NCDs	2/2
Operational, multisectoral national NCD policy, strategy or action plan	0/2
Operational policy, strategy or action plan for diabetes	2/2
Policy to reduce the impact on children of marketing of foods and beverages high in saturated fats, trans-fatty acids, free sugars or salt	2/2
Policy to limit saturated fatty acids and virtually eliminate industrially produced trans-fats	2/2

Sources: Global Fortification Data Exchange 2018; Sugar-sweetened data prepared using data from the NOURISHING database, academic references and market reports; FAO 2018; WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review, WHO Global Health Observatory.

Notes: Value refers to the number of countries with policy. NA = not applicable; NCD = non-communicable disease.

Targets included in national (nutrition or other) plan

Stunting	Anaemia
0/2	0/2
Low birth weight	Child overweight
1/2	1/2
Exclusive breastfeeding	Wasting
1/2	0/2
Salt intake	Overweight adults and adolescents
1/2	2/2
Multisectoral comprehensive nutrition plan	
1/2	

Sources: WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review.

Notes: Value refers to the number of countries with target.

# Economics and demography

## Poverty rates (%) and GDP (PPP\$)

Sources: World Bank 2019, IMF World Economic Outlook Database 2019.

Notes: PPP = purchasing power parity. Based on population weighted means of between 1 and 2 countries.

## Income inequality

Gini index score <sup>1</sup>	Gini index rank <sup>2</sup>	Year
NA	NA	NA

Sources: World Bank 2019.

Notes: <sup>1</sup> 0 = perfect equality, 100 = perfect inequality.<sup>2</sup> Countries are ranked from most equal (1) to most unequal (120).

## Under-five mortality (per 1,000 live births)
