

## Global overview

### Malnutrition burden

Throughout the world, there has been some progress towards achieving global nutrition targets.

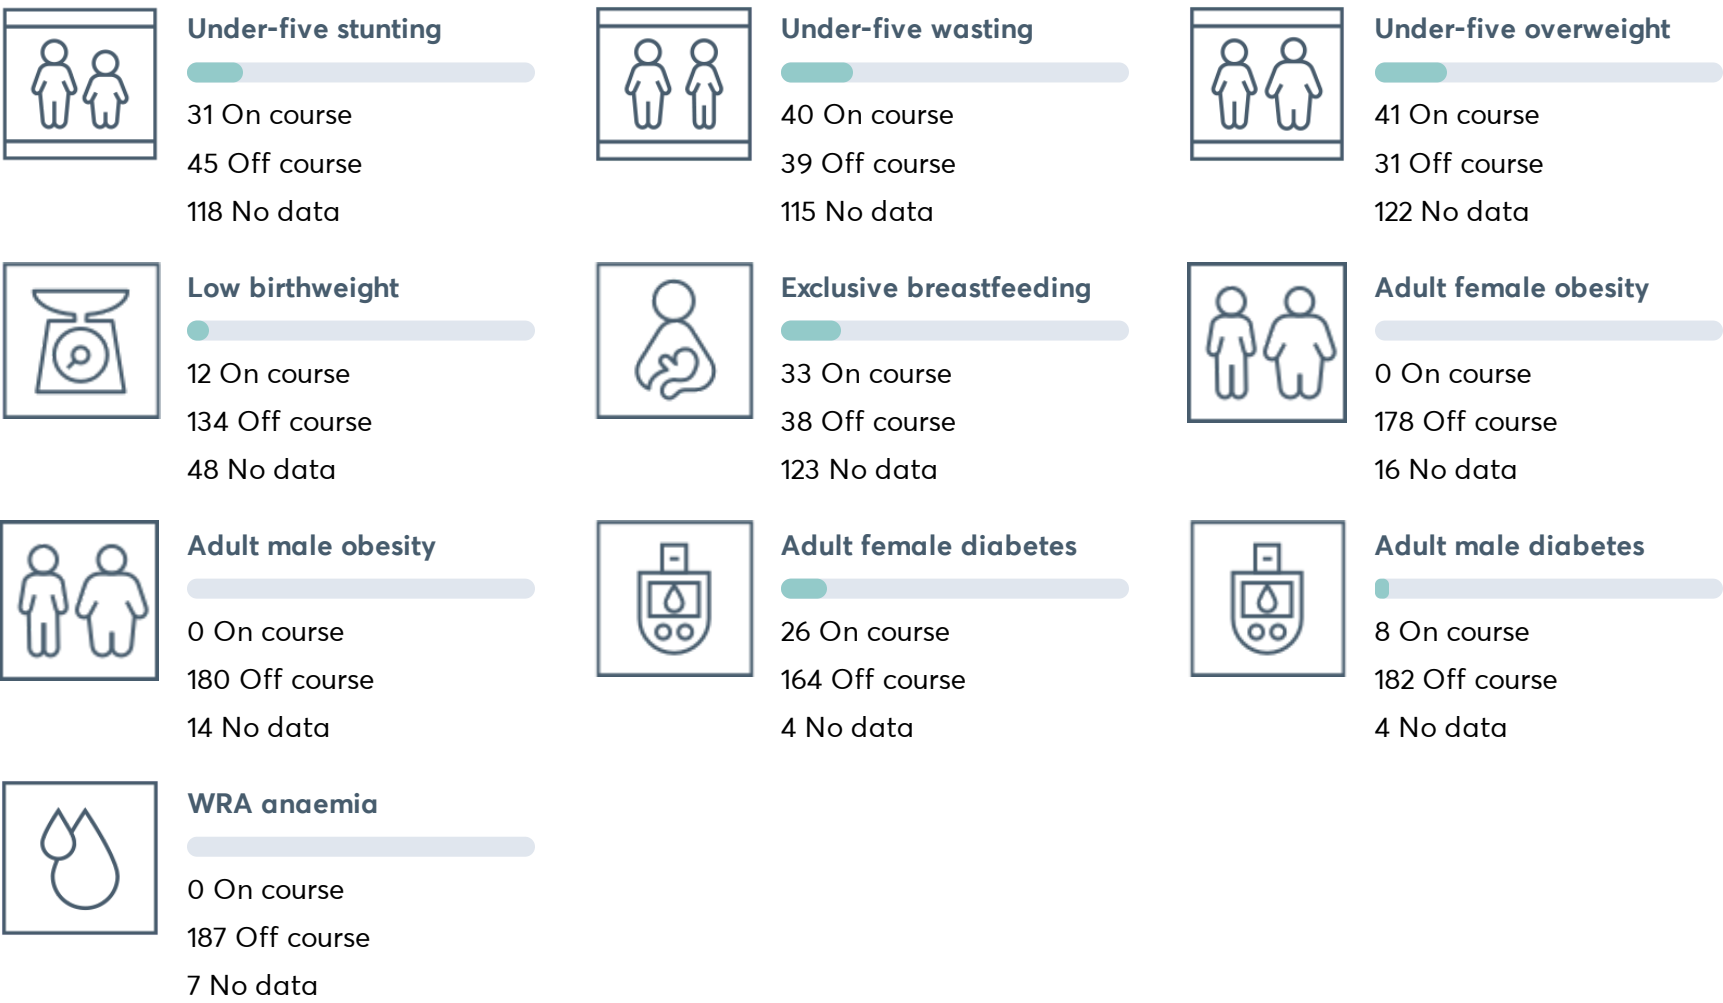

A total of 41 countries are on course to meet the global target for under-5 overweight, 40 countries are on course for under-5 wasting and 33 countries are on course for infant exclusive breastfeeding. In total, 31 countries are on course for under-5 stunting and 26 countries are on course for female diabetes. Meanwhile, 12 countries are on course for low birth weight and 8 countries are on course for male diabetes. However, not a single country in the world is on course for the targets: anaemia in women of reproductive age, male obesity and female obesity.

The world experiences a significant malnutrition burden among its under-5 population. The average global prevalence of overweight in the under-5 population is 5.9% and the prevalence of stunting is 21.9%. The prevalence of wasting in the under-5 population is 7.3%. A total of 41.2% of infants under 6 months are exclusively breastfed, while the world's average low birth weight prevalence is 14.6%. The adult population also faces a malnutrition burden. An average of 32.8% of women of reproductive age have anaemia, and 9% of adult men have diabetes, compared to 7.9% of women. Meanwhile, 14.7% of women and 10.5% of men are obese.

Notes: Based on population weighted means of between 86 and 194 countries.

# Resources, policies and targets

## Development assistance

Sources: Development Initiatives based on OECD Development Assistance Committee (DAC) Creditor Reporting System (CRS).

Notes: ODA = official development assistance. Amounts based on gross ODA disbursements, constant 2017 prices. Figure includes ODA grants and loans, but excludes other official flows and private grants.

# National policies

Mandatory legislation for salt iodisation	115/194
Sugar-sweetened beverage tax	73/194
Food-based dietary guidelines	92/194
Policy to reduce salt consumption	91/194
Operational policy, strategy or action plan to reduce unhealthy diet related to NCDs	152/194
Operational, multisectoral national NCD policy, strategy or action plan	98/194
Operational policy, strategy or action plan for diabetes	148/194
Policy to reduce the impact on children of marketing of foods and beverages high in saturated fats, trans-fatty acids, free sugars or salt	58/194
Policy to limit saturated fatty acids and virtually eliminate industrially produced trans-fats	68/194

Sources: Global Fortification Data Exchange 2018; Sugar-sweetened data prepared using data from the NOURISHING database, academic references and market reports; FAO 2018; WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review, WHO Global Health Observatory.

Notes: Value refers to the number of countries with policy. NA = not applicable; NCD = non-communicable disease.

Targets included in national (nutrition or other) plan

Stunting	Anaemia
111/194	87/194
Low birth weight	Child overweight
100/194	139/194
Exclusive breastfeeding	Wasting
127/194	101/194
Salt intake	Overweight adults and adolescents
108/194	160/194
Multisectoral comprehensive nutrition plan	
100/194	

Sources: WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review.

Notes: Value refers to the number of countries with target.

# Economics and demography

## Poverty rates (%) and GDP (PPP\$)

Sources: World Bank 2019, IMF World Economic Outlook Database 2019.

Notes: PPP = purchasing power parity. Based on population weighted means of 186 countries.

## Under-five mortality (per 1,000 live births)

Source: UN Inter-agency Group for Child Mortality Estimation 2018.

## Government revenues (\$m)

Sources: IMF Article IV staff reports (country specific) and IMF World Economic Outlook Database (April 2019).

## Income inequality

Gini index score <sup>1</sup>	Gini index rank <sup>2</sup>	Year
NA	NA	NA

Sources: World Bank 2019.

Notes: <sup>1</sup> 0 = perfect equality, 100 = perfect inequality.<sup>2</sup> Countries are ranked from most equal (1) to most unequal (159).

## Population

Population (thousands)	7,594,270	2018
Under-five population (thousands)	677,369	2019
Rural (%)	45	2018
>65 years (thousands)	702,933	2019

Sources: World Bank 2019, UN Population Division Department of Economic and Social Affairs 2019.

## Population density of health workers per 1,000 people

Physicians	1.49	2013
Nurses and midwives	3.14	2013
Community health workers	0.51	2016

Sources: WHO's Global Health Workforce Statistics, OECD, supplemented by country data.

Notes: Based on population weighted means of 64 countries.
