

## Country overview

### Malnutrition burden

Malaysia is on course to meet the global target for under-five overweight, but is off course to meet the targets for under-five stunting, under-five wasting, anaemia in women of reproductive age, low birth weight, male diabetes, and female diabetes. There is insufficient target data to assess Malaysia’s progress for infant exclusive breastfeeding, male obesity, and female obesity.

Although it performs relatively well against other developing countries, Malaysia still experiences a malnutrition burden among its under-five population. As of 2016, the national prevalence of under-five overweight is 6%, which has decreased slightly from 7.1% in 2015. The national prevalence of under-five stunting is 20.7%, which is less than the developing country average of 25%. Conversely, Malaysia’s under-five wasting prevalence of 11.5% is greater than the developing country average of 8.9%.

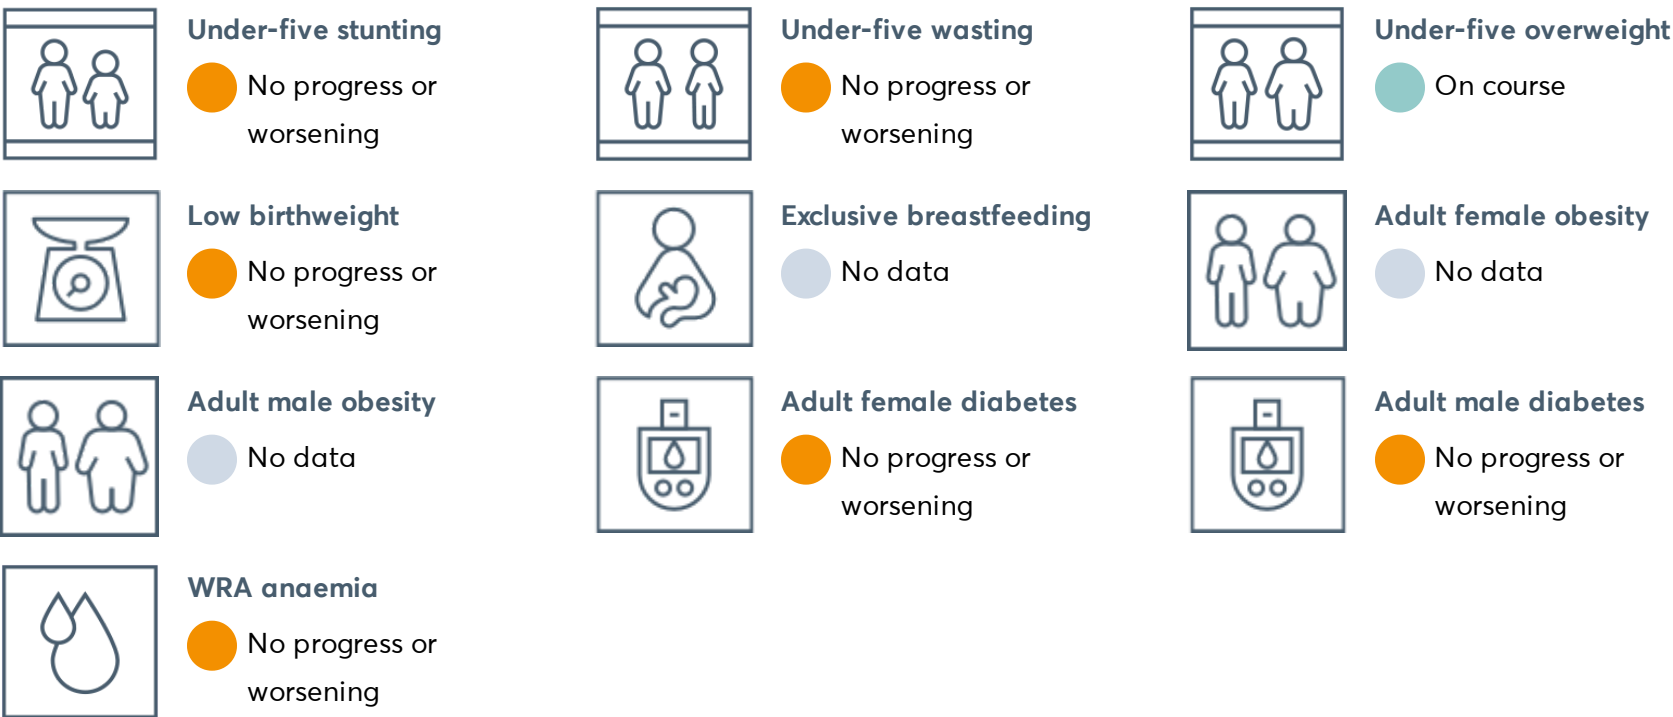

In Malaysia, 40.3% of infants under 23 months are exclusively breastfed. Malaysia’s 2015 low birth weight prevalence of 11.3% has decreased slightly from 11.4% in 2014.

Malaysia’s adult population also face a malnutrition burden. 24.9% of women of reproductive age have anaemia, and 11.4% of adult men have diabetes, compared to 10.7% of women. Meanwhile, 17.9% of women and 13% of men have obesity.

# Resources, policies and targets

## Development assistance

Sources: Development Initiatives based on OECD Development Assistance Committee (DAC) Creditor Reporting System (CRS).

Notes: ODA = official development assistance. Amounts based on gross ODA disbursements, constant 2017 prices. Figure includes ODA grants and loans, but excludes other official flows and private grants.

# National policies

Mandatory legislation for salt iodisation	No
Sugar-sweetened beverage tax	Yes
Food-based dietary guidelines	Yes
Policy to reduce salt consumption	Yes
Operational policy, strategy or action plan to reduce unhealthy diet related to NCDs	Yes
Operational, multisectoral national NCD policy, strategy or action plan	No
Operational policy, strategy or action plan for diabetes	Yes
Policy to reduce the impact on children of marketing of foods and beverages high in saturated fats, trans-fatty acids, free sugars or salt	Yes
Policy to limit saturated fatty acids and virtually eliminate industrially produced trans-fats	Yes

Sources: [Global Fortification Data Exchange 2018](#); Sugar-sweetened data prepared using data from the [NOURISHING database](#), academic references and market reports; [FAO 2018](#); [WHO Global database on the Implementation of Nutrition Action \(GINA\)](#), [2nd Global Nutrition Policy Review](#), [WHO Global Health Observatory](#).

Notes: NA = not applicable; NCD = non-communicable disease.

Targets included in national (nutrition or other) plan

Stunting	Anaemia
Yes	Yes
Low birth weight	Child overweight
Yes	Yes
Exclusive breastfeeding	Wasting
Yes	Yes
Salt intake	Overweight adults and adolescents
Yes	Yes
Multisectoral comprehensive nutrition plan	
Yes
