

Overview

Nutritional information

Nepal is off course to meet the global targets for all indicators analysed with adequate data. There is insufficient target data to assess Nepal's progress for female obesity.

Nepal experiences a malnutrition burden among its under-five population. As of 2016, the national prevalence of under-five overweight is 1.2%, which has decreased slightly from 2.1% in 2014. The national prevalence of under-five stunting is 36%, which is greater than the developing country average of 25%. Nepal's under-five wasting prevalence of 9.6% is also greater than the developing country average of 8.9%.

65.2% of infants under 23 months are exclusively breastfed, which is well above the Asia average of 28.9%. Nepal's 2015 low birth weight prevalence of 21.8% has decreased slightly from 22.1% in 2014.

Nepal's adult population also face malnutrition burdens. While there is no prevalence data available for anaemia among women of reproductive age, 11.7% of adult men suffer from diabetes, compared to 9.5% of women. Meanwhile, 5.4% of women and 2.7% of men suffer from obesity.

Sources: UNICEF/WHO/World Bank Group: Joint child malnutrition estimates, NCD Risk Factor Collaboration, WHO Global Health Observatory.

Notes: Thresholds for a country having the form or not: stunting in children aged under-five years >20%; anaemia in women of reproductive age >20%; overweight (body mass index >25) in adult women aged >18 years >35%.

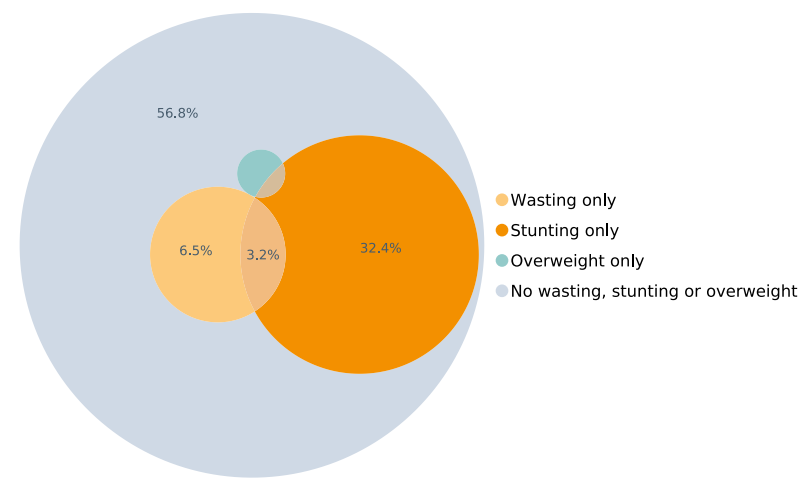

Progress against global nutrition targets 2018

Sources: UNICEF/WHO/World Bank Group: Joint child malnutrition estimates, NCD Risk Factor Collaboration, WHO Global Health Observatory.

Notes: WRA = Women of a reproductive age; NA = not applicable. The methodologies for tracking differ between targets. Data on the adult indicators are based on modelled estimates.

National policies

| | |
|--|-----|
| Mandatory legislation for salt iodisation | Yes |
| Sugar-sweetened beverage tax | No |
| Food-based dietary guidelines | Yes |
| Policy to reduce salt consumption | No |
| Operational policy, strategy or action plan to reduce unhealthy diet related to NCDs | Yes |
| Operational, multisectoral national NCD policy, strategy or action plan | Yes |
| Operational policy, strategy or action plan for diabetes | Yes |
| Policy to reduce the impact on children of marketing of foods and beverages high in saturated fats, trans-fatty acids, free sugars or salt | No |
| Policy to limit saturated fatty acids and virtually eliminate industrially produced trans-fats | No |

Sources: Global Fortification Data Exchange 2018; Sugar-sweetened data prepared using data from the NOURISHING database, academic references and market reports; FAO 2018; WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review, WHO Global Health Observatory.

Notes: Add note: NA = not applicable; NCD = non-communicable disease.

Targets included in national (nutrition or other) plan

| Stunting | Anaemia |
|--|-----------------------------------|
| Yes | Yes |
| Low birth weight | Child overweight |
| Yes | Yes |
| Exclusive breastfeeding | Wasting |
| Yes | Yes |
| Salt intake | Overweight adults and adolescents |
| Yes | Yes |
| Multisectoral comprehensive nutrition plan | |
| No | |
