

# Afghanistan

## Overview

### Malnutrition status

**Afghanistan is off course to meet the global targets for anaemia in women of reproductive age, male diabetes, female diabetes, male obesity, and female obesity. There is insufficient target data to assess Afghanistan's progress for under-five overweight, under-five stunting, under-five wasting, infant exclusive breastfeeding, and low birth weight.**

Afghanistan experiences a malnutrition burden among its under-five population. As of 2013, the national prevalence of under-five overweight is 5.4%, which has increased slightly from 4.6% in 2004. The national prevalence of under-five stunting is 40.9%, which is significantly greater than the developing country average of 25%. Afghanistan's under-five wasting prevalence of 9.5% is also greater than the developing country average of 8.9%.

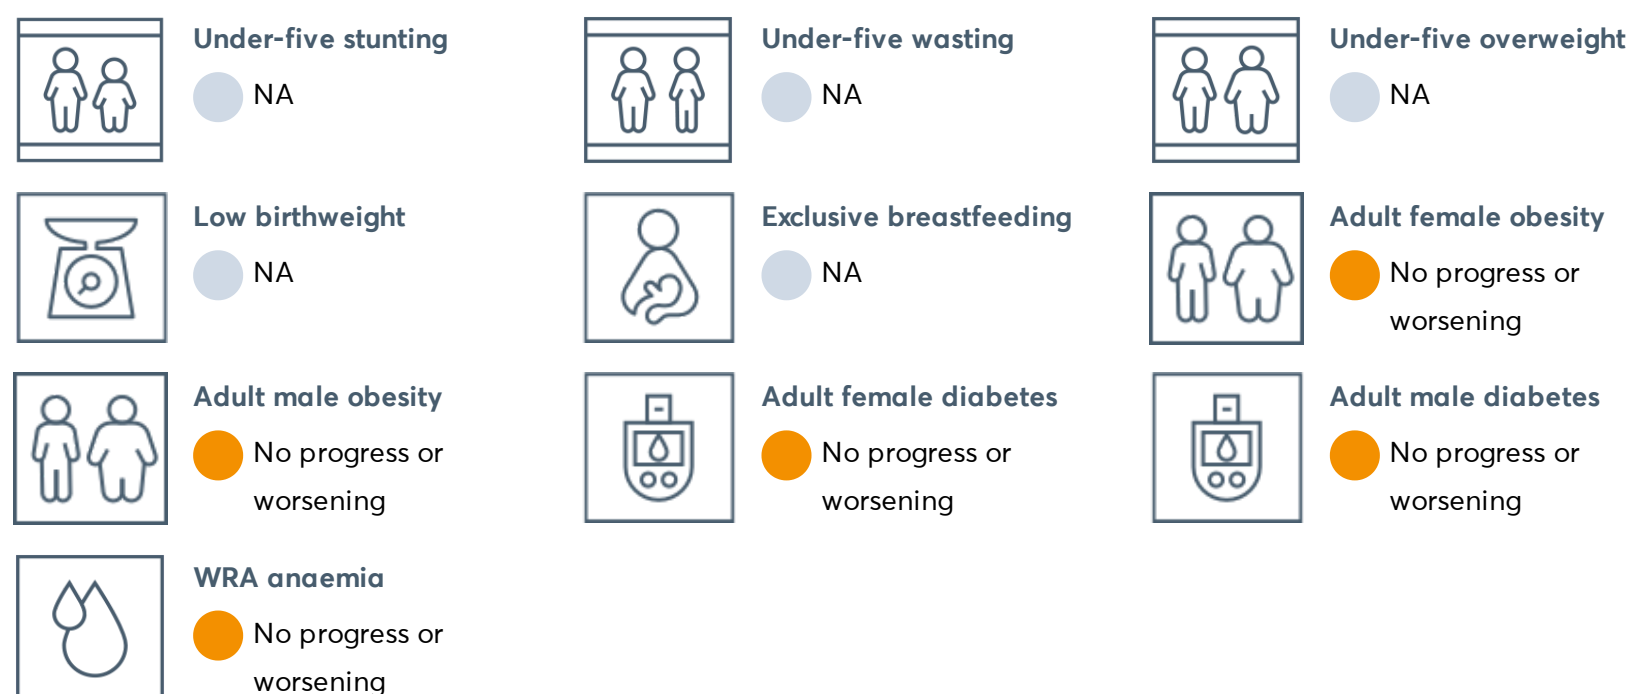

In Afghanistan, 43.1% of infants under 23 months are exclusively breastfed, this is well below the Southern Asia average of 53.9%. There is insufficient data on low birth weight.

Afghanistan's adult population also face a malnutrition burden. While there is no prevalence data available for anaemia among women of reproductive age, 12.2% of adult women suffer from diabetes, compared to 11.6% of men. Meanwhile, 7.6% of women and 3.2% of men suffer from obesity.

## National policies

Mandatory legislation for salt iodisation	Yes
Sugar-sweetened beverage tax	No
Food-based dietary guidelines	Yes
Policy to reduce salt consumption	Yes
Operational policy, strategy or action plan to reduce unhealthy diet related to NCDs	Yes
Operational, multisectoral national NCD policy, strategy or action plan	Yes
Operational policy, strategy or action plan for diabetes	Yes
Policy to reduce the impact on children of marketing of foods and beverages high in saturated fats, trans-fatty acids, free sugars or salt	No
Policy to limit saturated fatty acids and virtually eliminate industrially produced trans-fats	Yes

Sources: Global Fortification Data Exchange 2018; Sugar-sweetened data prepared using data from the NOURISHING database, academic references and market reports; FAO 2018; WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review, WHO Global Health Observatory.

Notes: Add note: NA = not applicable; NCD = non-communicable disease.

Targets included in national (nutrition or other) plan

Stunting	Anaemia
Yes	Yes
Low birth weight	Child overweight
Yes	Yes
Exclusive breastfeeding	Wasting
Yes	Yes
Salt intake	Overweight adults and adolescents
Yes	Yes
Multisectoral comprehensive nutrition plan	
Yes
