

## Subregional overview

### Malnutrition burden

In the Caribbean subregion, there has been some progress towards achieving global nutrition targets. The global target for under-five wasting has 3 countries on course to meet it, while under-five overweight has one country on course. However, not a single country in the subregion is on course to meet the targets for under-five stunting, infant exclusive breastfeeding, anaemia in women of reproductive age, low birth weight, male diabetes, female diabetes, male obesity, and female obesity. Thirteen countries in the subregion have insufficient data to comprehensively assess their progress towards these global targets.

Although it performs relatively well against other subregions, Caribbean still experiences a malnutrition burden among its under-five population. The average prevalence of overweight in under-fives is 7%, this is greater than the global average of 5.9%. Conversely, the Caribbean subregion’s prevalence of stunting in under-fives of 8.3% is significantly less than the global average of 21.9%. The prevalence of wasting in under-fives is 3%.

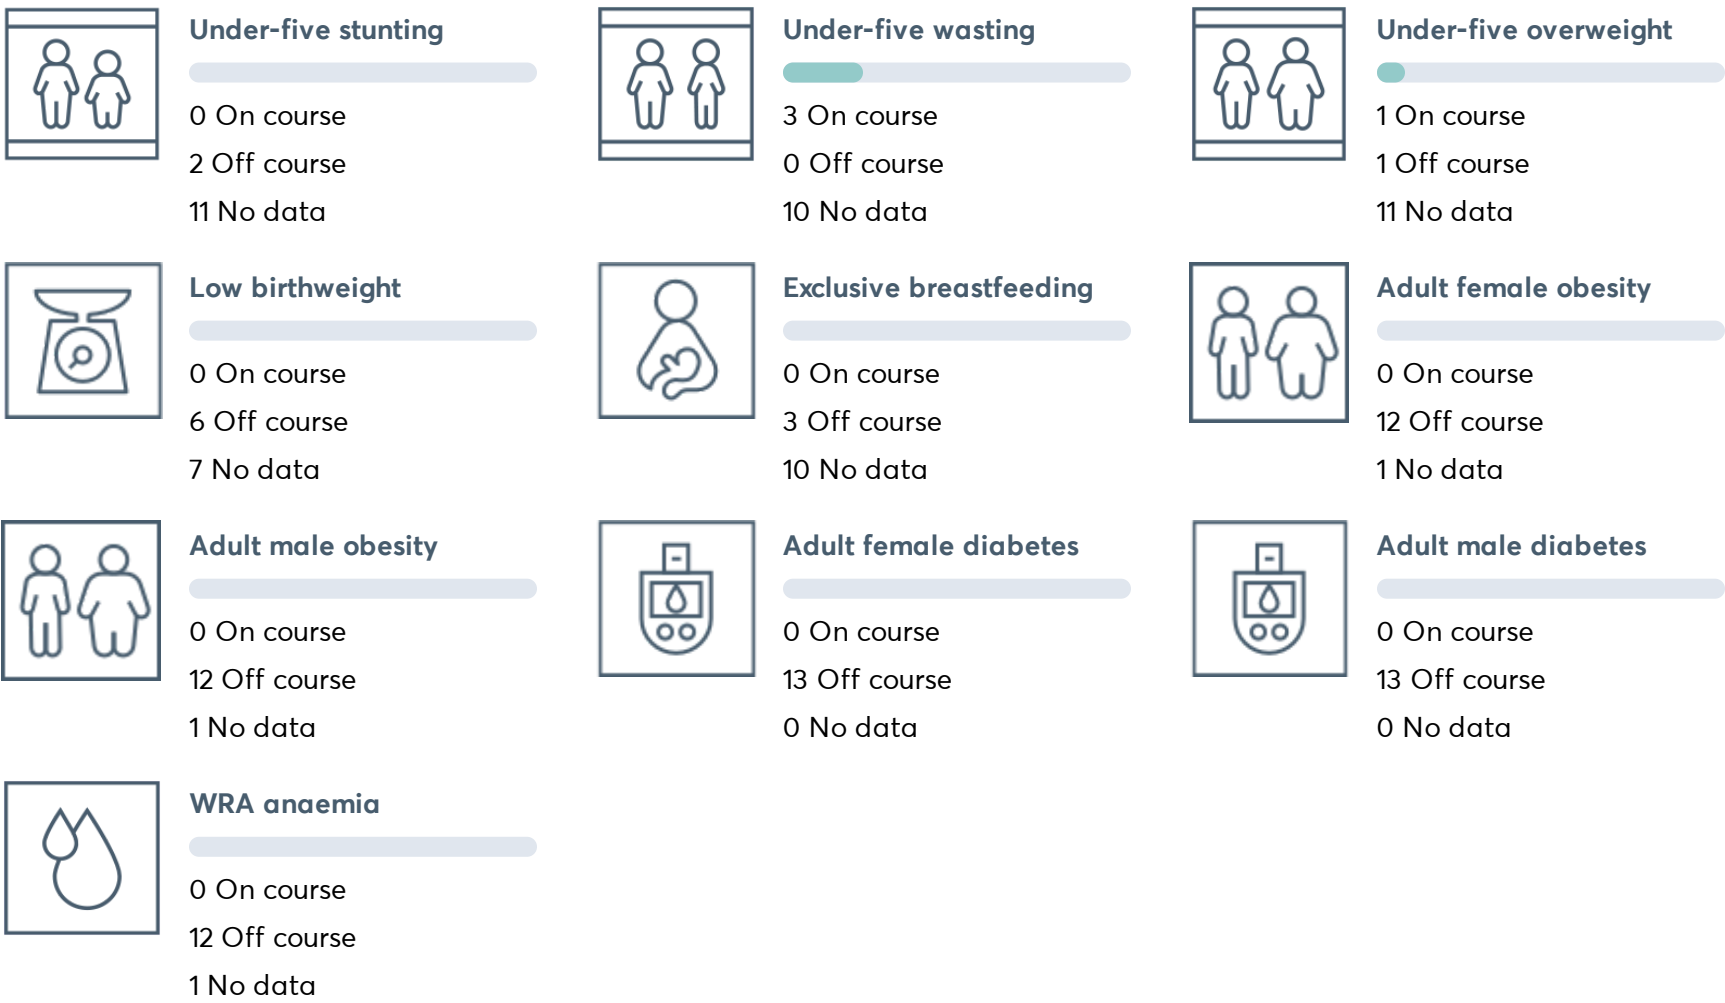

Some 25.6% of infants under 23 months in the Caribbean subregion are exclusively breastfed, while the subregion’s average low birth weight prevalence of 9.9% is less than the global average of 14.6%.

The Caribbean subregion’s adult population also face a malnutrition burden. An average of 32% of women of reproductive age have anaemia, and 10.5% of adult women have diabetes, compared to 8.4% of men. Meanwhile, 30.5% of women and 18.6% of men have obesity.

# Resources, policies and targets

## Development assistance

Sources: Development Initiatives based on OECD Development Assistance Committee (DAC) Creditor Reporting System (CRS).

Notes: ODA = official development assistance. Amounts based on gross ODA disbursements, constant 2017 prices. Figure includes ODA grants and loans, but excludes other official flows and private grants.

# National policies

Mandatory legislation for salt iodisation	1/13
Sugar-sweetened beverage tax	2/13
Food-based dietary guidelines	11/13
Policy to reduce salt consumption	3/13
Operational policy, strategy or action plan to reduce unhealthy diet related to NCDs	8/13
Operational, multisectoral national NCD policy, strategy or action plan	6/13
Operational policy, strategy or action plan for diabetes	9/13
Policy to reduce the impact on children of marketing of foods and beverages high in saturated fats, trans-fatty acids, free sugars or salt	0/13
Policy to limit saturated fatty acids and virtually eliminate industrially produced trans-fats	1/13

Sources: Global Fortification Data Exchange 2018; Sugar-sweetened data prepared using data from the NOURISHING database, academic references and market reports; FAO 2018; WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review, WHO Global Health Observatory.

Notes: Value refers to the number of countries with policy. NA = not applicable; NCD = non-communicable disease.

Targets included in national (nutrition or other) plan

Stunting	Anaemia
7/13	6/13
Low birth weight	Child overweight
6/13	9/13
Exclusive breastfeeding	Wasting
8/13	6/13
Salt intake	Overweight adults and adolescents
8/13	9/13
Multisectoral comprehensive nutrition plan	
7/13	

Sources: WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review.

Notes: Value refers to the number of countries with target.

# Economics and demography

## Poverty rates (%) and GDP (PPP\$)

Sources: World Bank 2019, IMF World Economic Outlook Database 2019.

Notes: PPP = purchasing power parity. Based on population weighted means of between 5 and 12 countries.

## Income inequality

Gini index score <sup>1</sup>	Gini index rank <sup>2</sup>	Year
NA	NA	NA

Sources: World Bank 2019.

Notes: <sup>1</sup> 0 = perfect equality, 100 = perfect inequality.<sup>2</sup> Countries are ranked from most equal (1) to most unequal (120).

## Under-five mortality (per 1,000 live births)
