

## Country overview

### Malnutrition burden

**Iraq is off course to meet the global targets for infant exclusive breastfeeding, anaemia in women of reproductive age, male diabetes, female diabetes, male obesity, and female obesity. There is insufficient target data to assess Iraq’s progress for under-five overweight, under-five stunting, under-five wasting, and low birth weight.**

Although it performs relatively well against other developing countries, Iraq still experiences a malnutrition burden among its under-five population. As of 2011, the national prevalence of under-five overweight is 11.4%, which has decreased from 15% in 2006. The national prevalence of under-five stunting is 22.1%, which is less than the developing country average of 25%. Iraq’s under-five wasting prevalence of 6.5% is also less than the developing country average of 8.9%.

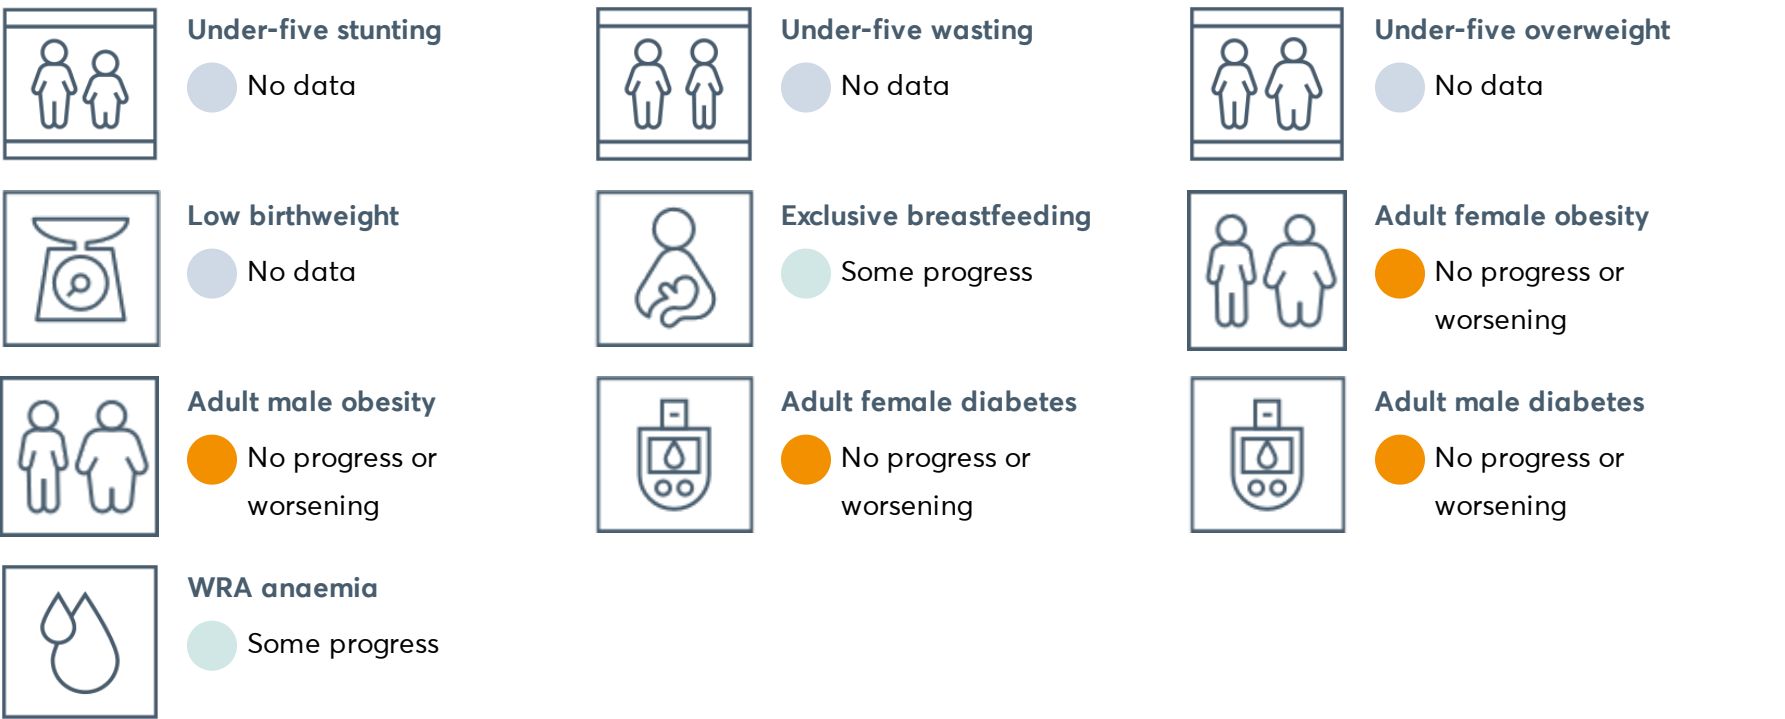

In Iraq, 25.8% of infants under 6 months are exclusively breastfed. There is insufficient data on low birth weight.

Iraq’s adult population also face a malnutrition burden. 29.1% of women of reproductive age have anaemia, and 17.5% of adult women have diabetes, compared to 17.2% of men. Meanwhile, 37% of women and 23.4% of men have obesity.

# Resources, policies and targets

## Development assistance

Sources: Development Initiatives based on OECD Development Assistance Committee (DAC) Creditor Reporting System (CRS).

Notes: ODA = official development assistance. Amounts based on gross ODA disbursements, constant 2017 prices. Figure includes ODA grants and loans, but excludes other official flows and private grants.

# National policies

|  |         |
|--|---------|
| Mandatory legislation for salt iodisation  | No      |
| Sugar-sweetened beverage tax   | No      |
| Food-based dietary guidelines  | No data |
| Policy to reduce salt consumption  | Yes     |
| Operational policy, strategy or action plan to reduce unhealthy diet related to NCDs   | Yes     |
| Operational, multisectoral national NCD policy, strategy or action plan  | Yes     |
| Operational policy, strategy or action plan for diabetes   | Yes     |
| Policy to reduce the impact on children of marketing of foods and beverages high in saturated fats, trans-fatty acids, free sugars or salt | No      |
| Policy to limit saturated fatty acids and virtually eliminate industrially produced trans-fats   | Yes     |
