

## Country overview

### Malnutrition burden

**Timor-Leste is on course to meet the global target for under-five overweight, but is off course to meet the targets for all other indicators analysed with adequate data. There is insufficient target data to assess Timor-Leste’s progress for low birth weight.**

Timor-Leste experiences a malnutrition burden among its under-five population. As of 2013, the national prevalence of under-five overweight is 1.4%, which has decreased from 5.8% in 2009. The national prevalence of under-five stunting is 50.9%, which is significantly greater than the developing country average of 25%. Timor-Leste’s under-five wasting prevalence of 10.5% is also greater than the developing country average of 8.9%.

In Timor-Leste, 50.2% of infants under 6 months are exclusively breastfed, this is well above the South-eastern Asia average of 43.7%. There is insufficient data on low birth weight.

Timor-Leste’s adult population also face a malnutrition burden. 41.3% of women of reproductive age have anaemia, and 5.5% of adult women have diabetes, compared to 5.4% of men. Meanwhile, 4.9% of women and 2.6% of men have obesity.

# National policies

Mandatory legislation for salt iodisation	No
Sugar-sweetened beverage tax	No
Food-based dietary guidelines	No data
Policy to reduce salt consumption	No
Operational policy, strategy or action plan to reduce unhealthy diet related to NCDs	Yes
Operational, multisectoral national NCD policy, strategy or action plan	Yes
Operational policy, strategy or action plan for diabetes	Yes
Policy to reduce the impact on children of marketing of foods and beverages high in saturated fats, trans-fatty acids, free sugars or salt	No
Policy to limit saturated fatty acids and virtually eliminate industrially produced trans-fats	No

Sources: Global Fortification Data Exchange 2018; Sugar-sweetened data prepared using data from the NOURISHING database, academic references and market reports; FAO 2018; WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review, WHO Global Health Observatory.

Notes: NA = not applicable; NCD = non-communicable disease.

Targets included in national (nutrition or other) plan

Stunting	Anaemia
Yes	Yes
Low birth weight	Child overweight
Yes	No
Exclusive breastfeeding	Wasting
Yes	Yes
Salt intake	Overweight adults and adolescents
Yes	No
Multisectoral comprehensive nutrition plan	
Yes
