

## Country overview

### Malnutrition burden

**There is insufficient target data to assess Liechtenstein’s progress for all targets analysed.**

Liechtenstein has no prevalence data available for under-five overweight, stunting, or wasting.

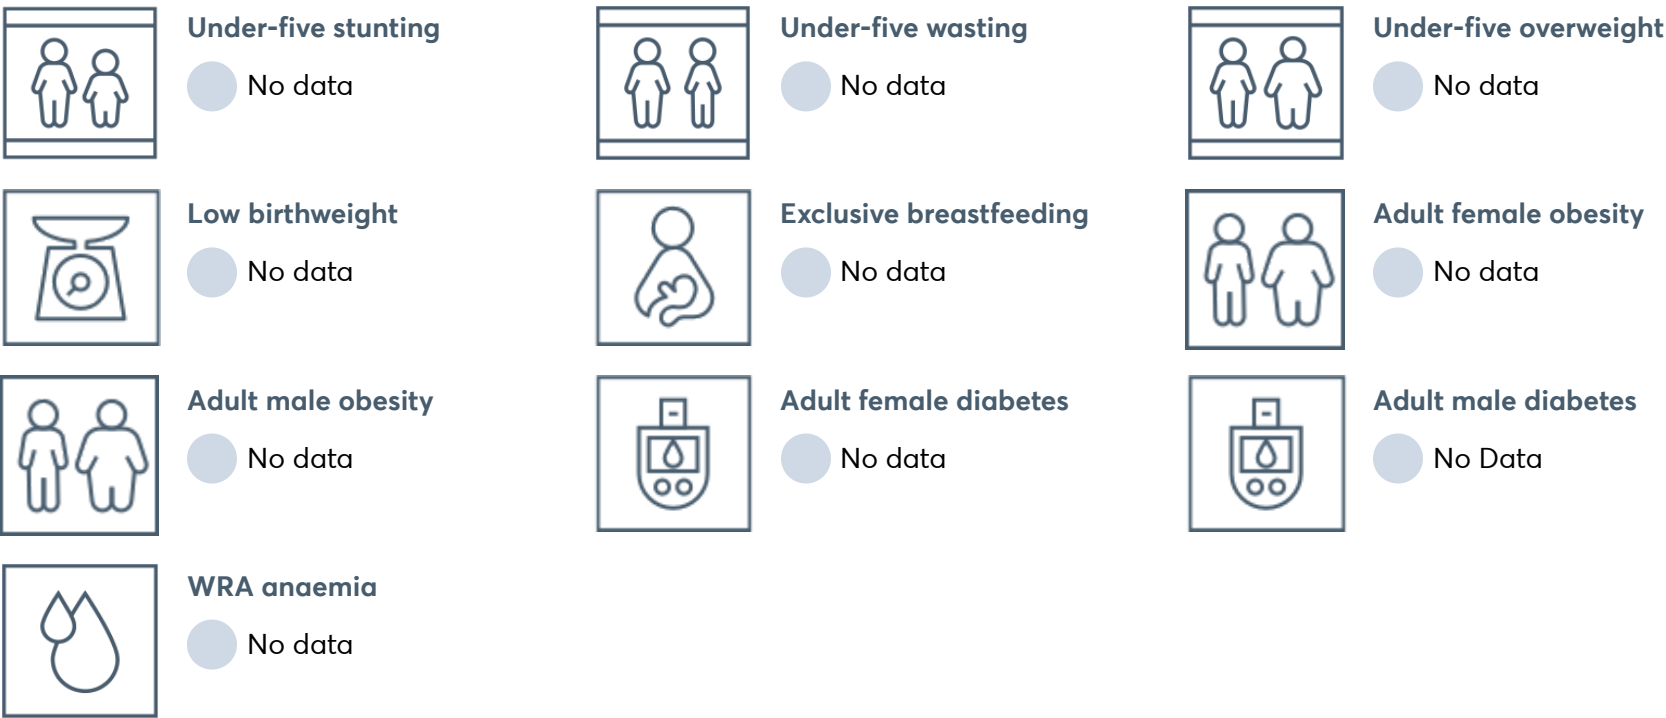

There is also insufficient data on exclusive breastfeeding among infants, and on low birth weight.

Data on adult malnutrition burdens is also unavailable, including information on anaemia among women of reproductive age, as well as adult obesity and diabetes.

Sources: UNICEF/WHO/World Bank Group: Joint child malnutrition estimates, UNICEF/WHO Low birthweight estimates, NCD Risk Factor Collaboration, WHO Global Health Observatory.

Notes: Data on the adult indicators are based on modelled estimates.

### Progress against global nutrition targets 2018

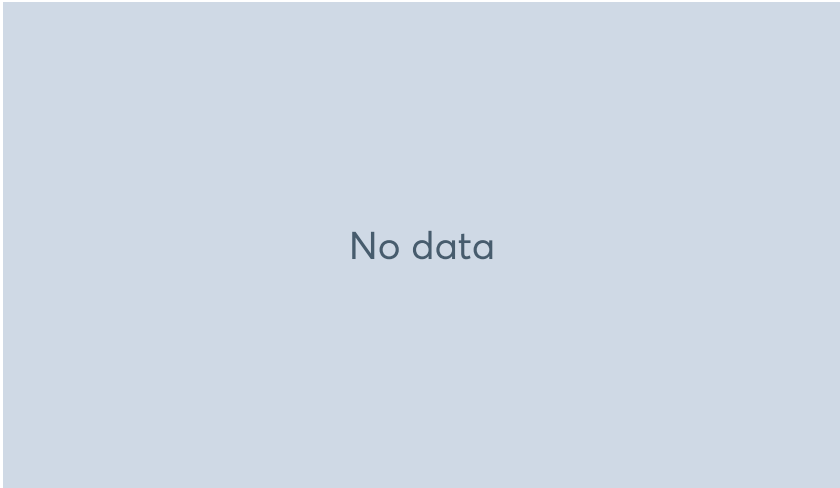

Sources: UNICEF global databases Infant and Young Child Feeding, UNICEF/WHO/World Bank Group: Joint child malnutrition estimates, NCD Risk Factor Collaboration, WHO Global Health Observatory and Global Burden of Disease, the Institute for Health Metrics and Evaluation.

Notes: WRA = Women of a reproductive age; NA = not applicable. The methodologies for tracking differ between targets. Data on the adult indicators are based on modelled estimates.

# Resources, policies and targets

## Development assistance

Sources: Development Initiatives based on OECD Development Assistance Committee (DAC) Creditor Reporting System (CRS).

Notes: ODA = official development assistance. Amounts based on gross ODA disbursements, constant 2017 prices. Figure includes ODA grants and loans, but excludes other official flows and private grants.

## National policies

Mandatory legislation for salt iodisation	No data
Sugar-sweetened beverage tax	No data
Food-based dietary guidelines	No data
Policy to reduce salt consumption	No data
Operational policy, strategy or action plan to reduce unhealthy diet related to NCDs	No data
Operational, multisectoral national NCD policy, strategy or action plan	No data
Operational policy, strategy or action plan for diabetes	No data
Policy to reduce the impact on children of marketing of foods and beverages high in saturated fats, trans-fatty acids, free sugars or salt	No data
Policy to limit saturated fatty acids and virtually eliminate industrially produced trans-fats	No data

Sources: [Global Fortification Data Exchange 2018](#); Sugar-sweetened data prepared using data from the [NOURISHING database](#), academic references and market reports; [FAO 2018](#); [WHO Global database on the Implementation of Nutrition Action \(GINA\)](#), [2nd Global Nutrition Policy Review](#), [WHO Global Health Observatory](#).

Notes: NA = not applicable; NCD = non-communicable disease.

Targets included in national (nutrition or other) plan

Stunting	Anaemia
No data	No data
Low birth weight	Child overweight
No data	No data
Exclusive breastfeeding	Wasting
No data	No data
Salt intake	Overweight adults and adolescents
No data	No data
Multisectoral comprehensive nutrition plan	
No data
