

# Middle Africa

## Overview

### Malnutrition status

In the Middle Africa subregion, there has been some progress towards achieving global nutrition targets. The global target for infant exclusive breastfeeding has 4 countries on course to meet it. The target for under-five overweight has 3 countries on course. The target for under-five wasting has 2 countries on course. The target for under-five stunting has one country on course. However, not a single country in the Middle Africa subregion is on course for anaemia in women of reproductive age, low birth weight, male diabetes, female diabetes, male obesity, and female obesity. 5 countries in the subregion have insufficient data to comprehensively assess their progress towards these global targets.

Although it performs relatively well against other subregions, Middle Africa still experiences a malnutrition burden among its under-five population. The average prevalence of overweight in under-fives is 4.6%, this is less than the global average of 5.9%. The prevalence of stunting in under-fives is 32.1% - the second highest compared to other subregions in Africa. The prevalence of wasting in under-fives is 7.2%, this is less than the global average of 7.3%.

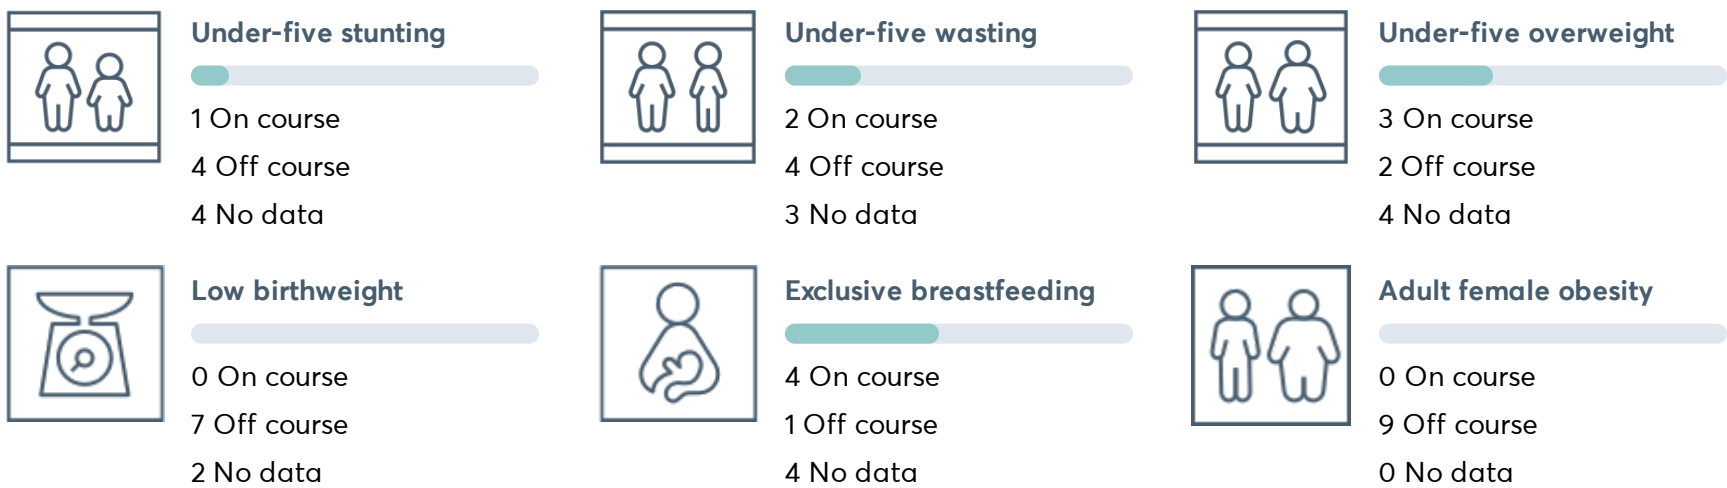

Some 37.4% of infants under 23 months in the Middle Africa subregion are exclusively breastfed, while the subregion's average low birth weight prevalence of 12.5% is less than the global average of 14.6%.

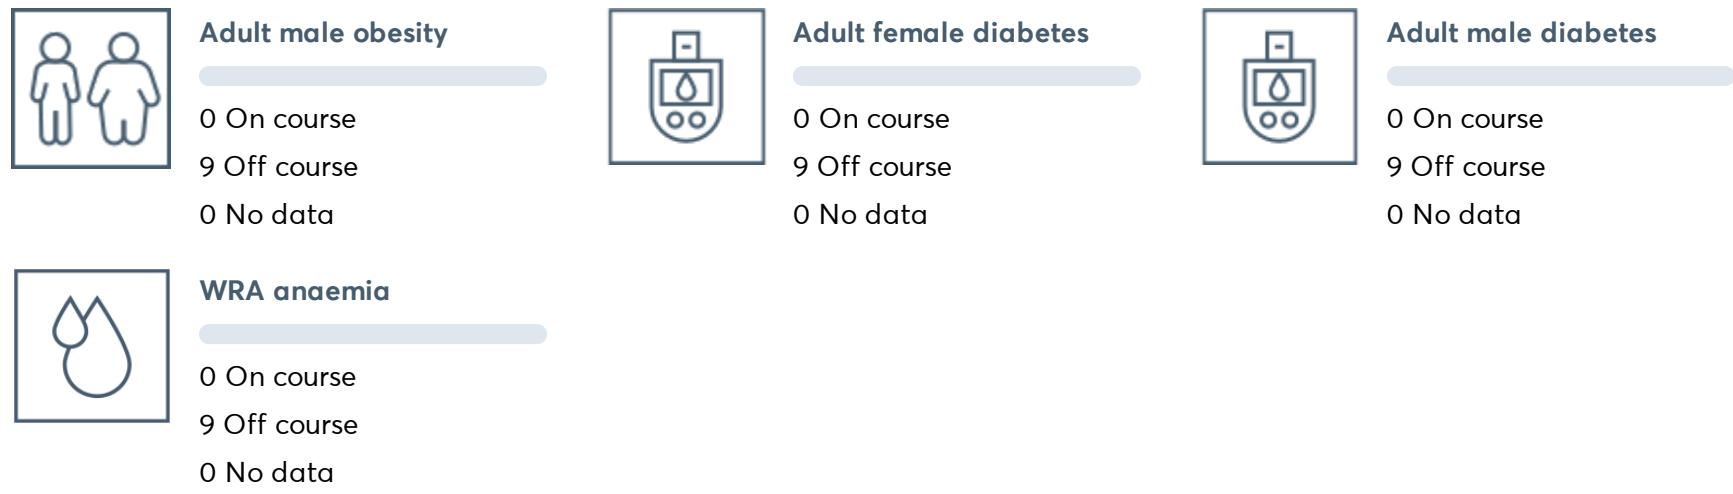

The Middle Africa subregion's adult population also face a malnutrition burden. An average of 43.6% of women of reproductive age have anaemia, and 7% of adult men suffer from diabetes, compared to 6.7% of women. Meanwhile, 11.4% of women and 4.1% of men suffer from obesity.

Notes: Based on population weighted means of between 8 and 9 countries.

# Resources, policies and targets

## Development assistance

Sources: Development Initiatives based on OECD Development Assistance Committee (DAC) Creditor Reporting System (CRS).

Notes: ODA = official development assistance. Amounts based on gross ODA disbursements, constant 2017 prices. Figure includes ODA grants and loans, but excludes other official flows and private grants.

# National policies

Mandatory legislation for salt iodisation	7/9
Sugar-sweetened beverage tax	0/9
Food-based dietary guidelines	0/9
Policy to reduce salt consumption	1/9
Operational policy, strategy or action plan to reduce unhealthy diet related to NCDs	4/9
Operational, multisectoral national NCD policy, strategy or action plan	2/9
Operational policy, strategy or action plan for diabetes	5/9
Policy to reduce the impact on children of marketing of foods and beverages high in saturated fats, trans-fatty acids, free sugars or salt	1/9
Policy to limit saturated fatty acids and virtually eliminate industrially produced trans-fats	1/9

Sources: Global Fortification Data Exchange 2018; Sugar-sweetened data prepared using data from the NOURISHING database, academic references and market reports; FAO 2018; WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review, WHO Global Health Observatory.

Notes: Value refers to the number of countries with policy. NA = not applicable; NCD = non-communicable disease.

Targets included in national (nutrition or other) plan

Stunting	Anaemia
7/9	2/9
Low birth weight	Child overweight
4/9	3/9
Exclusive breastfeeding	Wasting
6/9	8/9
Salt intake	Overweight adults and adolescents
2/9	5/9
Multisectoral comprehensive nutrition plan	
4/9	

Sources: WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review.

Notes: Value refers to the number of countries with target.

# Economics and demography

## Poverty rates (%) and GDP (PPP\$)

Sources: World Bank 2019, IMF World Economic Outlook Database 2019.

Notes: PPP = purchasing power parity. Based on population weighted means of between 7 and 9 countries.

## Under-five mortality (per 1,000 live births)

Source: UN Inter-agency Group for Child Mortality Estimation 2018.

Notes: Based on population weighted means of 9 countries.

## Government revenues (\$m)

Sources: IMF Article IV staff reports (country specific) and IMF World Economic Outlook Database (April 2019).

## Income inequality

Gini index score <sup>1</sup>	Gini index rank <sup>2</sup>	Year
NA	NA	NA

Sources: World Bank 2019.

Notes: <sup>1</sup> 0 = perfect equality, 100 = perfect inequality.<sup>2</sup> Countries are ranked from most equal (1) to most unequal (120).

## Population

Population (thousands)	52,906	2018
Under-five population (thousands)	30,190	2019
Rural (%)	50	2018
>65 years (thousands)	4,817	2019

Sources: World Bank 2019, UN Population Division Department of Economic and Social Affairs 2019.

Notes: Based on population weighted means of 9 countries.

## Population density of health workers per 1,000 people

Physicians	0.1	2016
Nurses and midwives	0.91	2016
Community health workers	0.16	2016

Sources: WHO's Global Health Workforce Statistics, OECD, supplemented by country data.

Notes: Based on population weighted means of between 4 and 9 countries.
