

## Subregional overview

### Malnutrition burden

In the Western Europe subregion, there has been some progress towards achieving global nutrition targets. The global target for female diabetes has seven countries on course to meet it, while male diabetes has one country on course. However, not a single country in the subregion is on course to meet the targets for under-five overweight, under-five stunting, under-five wasting, infant exclusive breastfeeding, anaemia in women of reproductive age, low birth weight, male obesity, and female obesity. Nine countries in the subregion have insufficient data to comprehensively assess their progress towards these global targets.

The Western Europe subregion has no prevalence data available for under-five overweight, stunting, or wasting.

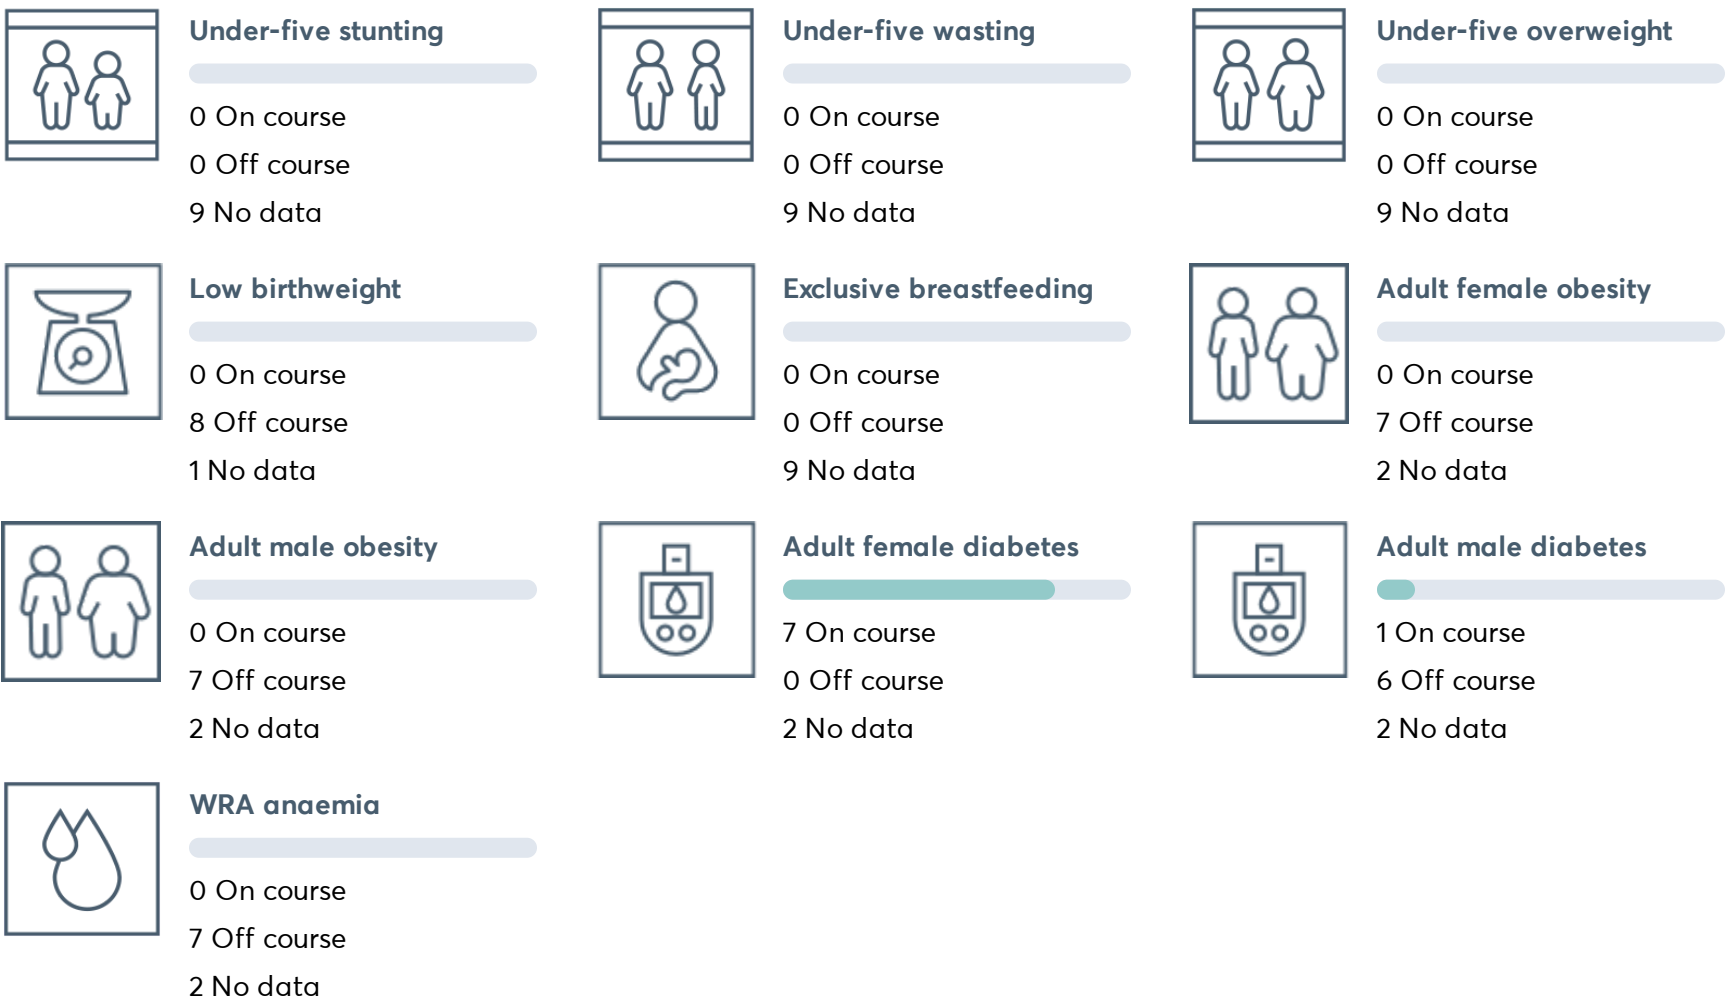

There is also insufficient data on exclusive breastfeeding among infants, while the subregion's average low birth weight prevalence of 6.9% is less than the global average of 14.6%.

The Western Europe subregion's adult population face a malnutrition burden. An average of 17% of women of reproductive age have anaemia, and 6.4% of adult men have diabetes, compared to 3.9% of women. Meanwhile, 22.9% of men and 20.4% of women have obesity.

# Resources, policies and targets

## Development assistance

Sources: Development Initiatives based on OECD Development Assistance Committee (DAC) Creditor Reporting System (CRS).

Notes: ODA = official development assistance. Amounts based on gross ODA disbursements, constant 2017 prices. Figure includes ODA grants and loans, but excludes other official flows and private grants.

# National policies

Mandatory legislation for salt iodisation	1/8
Sugar-sweetened beverage tax	3/8
Food-based dietary guidelines	6/8
Policy to reduce salt consumption	4/8
Operational policy, strategy or action plan to reduce unhealthy diet related to NCDs	8/8
Operational, multisectoral national NCD policy, strategy or action plan	4/8
Operational policy, strategy or action plan for diabetes	7/8
Policy to reduce the impact on children of marketing of foods and beverages high in saturated fats, trans-fatty acids, free sugars or salt	5/8
Policy to limit saturated fatty acids and virtually eliminate industrially produced trans-fats	6/8

Sources: Global Fortification Data Exchange 2018; Sugar-sweetened data prepared using data from the NOURISHING database, academic references and market reports; FAO 2018; WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review, WHO Global Health Observatory.

Notes: Value refers to the number of countries with policy. NA = not applicable; NCD = non-communicable disease.

Targets included in national (nutrition or other) plan

Stunting	Anaemia
0/8	0/8
Low birth weight	Child overweight
1/8	6/8
Exclusive breastfeeding	Wasting
1/8	0/8
Salt intake	Overweight adults and adolescents
2/8	7/8
Multisectoral comprehensive nutrition plan	
3/8
