Philippines

Country overview

Malnutrition burden

The Philippines is off course to meet the global targets for all indicators analysed with adequate data. There is insufficient target data to assess the Philippines' progress for infant exclusive breastfeeding.

Although it performs relatively well against other developing countries, the Philippines still experiences a malnutrition burden among its under-five population. As of 2015, the national prevalence of under-five overweight is 3.9%, which has decreased slightly from 5% in 2013. The national prevalence of under-five stunting is 33.4%, which is greater than the developing country average of 25%. Conversely, the Philippines' under-five wasting prevalence of 7.1% is less than the developing country average of 8.9%.

In the Philippines, 33% of infants under 6 months are exclusively breastfed. The Philippines' 2015 low birth weight prevalence of 20.1% has decreased slightly from 21.5% in 2000.

The Philippines' adult population also face a malnutrition burden. 15.7% of women of reproductive age have anaemia, and 7.3% of adult women have diabetes, compared to 7.1% of men. Meanwhile, 7.5% of women and 5.2% of men have obesity.

National policies

Mandatory legislation for salt iodisation	Yes
Sugar-sweetened beverage tax	Yes
Food-based dietary guidelines	Yes
Policy to reduce salt consumption	No
Operational policy, strategy or action plan to reduce unhealthy diet related to NCDs	No
Operational, multisectoral national NCD policy, strategy or action plan	No
Operational policy, strategy or action plan for diabetes	No
Policy to reduce the impact on children of marketing of foods and beverages high in saturated fats, trans-fatty acids, free sugars or salt	No
Policy to limit saturated fatty acids and virtually eliminate industrially produced trans-fats	No

Sources: Global Fortification Data Exchange 2018; Sugar-sweetened data prepared using data from the NOURISHING database, academic references and market reports; FAO 2018; WHO Global database on the Implementation of Nutrition Action (GINA), 2nd Global Nutrition Policy Review, WHO Global Health Observatory.
